

# iToBoS Workshop on Skin Lesion Detection with 3D-TBP

## Venue

Sala d'Actes  
P4 Building, Polytechnic School  
Campus Montilivi - University of Girona  
17003 Girona

## Overview

The workshop brings together researchers and practitioners in the fields of dermatology, medical imaging, machine learning, and artificial intelligence to present a comprehensive overview of the latest developments and ongoing research in computer-aided dermatological diagnostics.

The event will feature a recap of the recent skin lesion detection competition, showcasing the winning solutions. Participants will also gain insights from talks by leading researchers and industry experts, who will share their perspectives on the current state and future directions of skin lesion analysis. This workshop aims to foster collaboration and knowledge exchange, driving advancements in the timely diagnosis and treatment of skin cancer.
